ABOUT ME

I am a high school graduate majoring in software engineering who has the ability in that field. Develop a program is one of the fields of work that I am very interest in, with that I managed to win a competition organized by the government. The beginning of my journey began when I did an internship at a company last year with 3 months of work, I did an internship and got a job as a website developer. Being a website developer is a very observant, thorough, creative, and logical job. Therefore I will continue to develop my skills
